Questor Technology Inc.

20 years changing the way the world handles waste gases

What We Do

QUESTOR is a leading provider of 99.99% efficient, safe, reliable and regulatory compliant patented waste gas combustion systems across an array of industries.

QUESTOR specializes in the clean combustion of waste gases, methane, VOC's, HAP's and BTEX, addressing air quality and GHG emissions. We recover the waste heat from clean combustion and other sources to treat waste water and generate power at *ClearPower*.

QUESTOR's solutions improve safety, reduce costs, improve energy efficiency, achieve compliance, reduce GHG emissions while gaining public support.

QUESTOR's adaptability has resulted in unique solutions that have become industry standards in an ever-changing, competitive market.

The Problem We Are Solving

BEFORE

QUESTOR

Community acceptance; operating and capital cost reductions; safety; energy efficiency; emission regulations: VOC, HAP's, methane, air quality, GHG emissions, low carbon operations, green/closed loop completions, no flaring, no venting, no odours

Global Impact

- 14 Bcf/d flared and vented emits 4.85 Gt/yr CO₂e
- Cleanly combusting all this gas reduces GHG CO₂e to 0.25 Gt/yr

With clean combustion technology;

- *Emissions reduced 4.6 Gt/yr.*
- *CO₂e reduction < \$0.50/t*
- *Global cost of less than \$3.3 billion*
- *Takes 1,000,000,000 cars off the road*

Converting Methane to CO₂ is the most effective way to stop the temperature rise

Creating Value From Waste

Clean Emissions Solutions

99.99% Combustion Efficiency
Clean Emissions - CO₂ and Water

Revenue	\$15.1 million
Cash	\$9.5 million
Net Debt	Nil

Consistent Revenue Growth

Gross Revenue

Adj. EBITDA

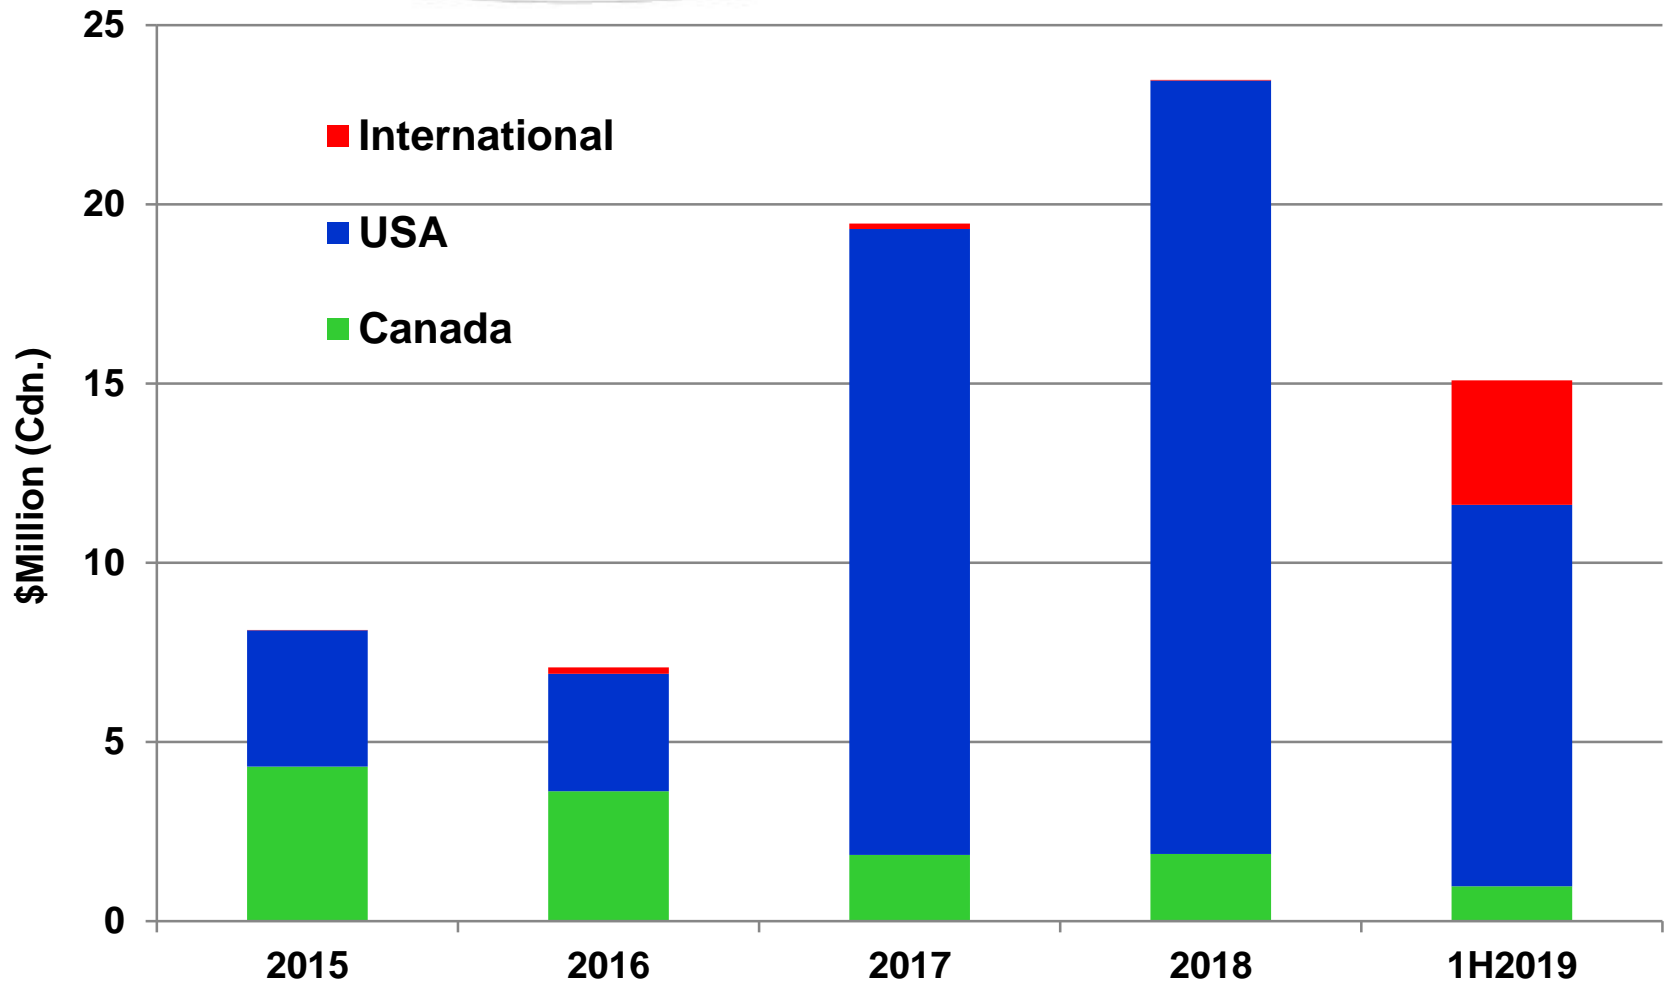

Rental Revenue

USA Revenue

Revenue by Region

Colorado

- Air quality issues: non-attainment zones
- Lack of gas pipeline take away capacity
- Win-win created with stringent regulations
- Senate Bill 181 has created a framework for industry and community to work together
- Questor has established a strong market presence and significantly reduced customer concentration

New Growth Opportunity in Mexico

- Methane emission reduction target of 75% by 2025 from oil and gas industry
- Mexico's environmental regulations will reward companies that harness benefits from associated gas
- Fines and oil production curtailment for non compliance
- Currently executing two large projects - \$ 8.5MM
 - 3 sites – waste heat to power
 - 10 sites – methane and HAP's destruction

Questor combustion unit

Questor anticipates significant interest in its integrated combustion and waste heat to power solutions
